Mumbai, India | +91 9022251303 | amangupta032005@gmail.com
GitHub: github.com/AmanGupta52 | LinkedIn: www.linkedin.com/in/aman-gupta-pro

PROFESSIONAL SUMMARY

Full Stack Developer specializing in MERN stack with strong foundations in Data Structures and system design basics. Experienced in building real-time applications and RESTful APIs with focus on performance and scalability. Interested in backend engineering and applied machine learning systems.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C

Frontend: HTML, CSS, React, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Docker

Core Concepts: DSA, OOP, DBMS, OS

PROJECTS

Real-Time Chat Application | React, Node.js, Socket.io || <https://amanchat.netlify.app/>

- Developed a full-stack real-time chat application enabling instant messaging between multiple users
- Implemented bi-directional communication using Socket.io for low-latency message delivery
- Implemented dynamic chat room management with user session handling with dynamic user joining and leaving events
- Integrated user presence indicators and real-time notifications
- Deployed the application on a cloud platform for public access and testing

MindConnect – Full-Stack Consultancy Website | MERN Stack || <https://balancedmindsconsultancy.netlify.app/>

- Built a full-stack consultancy platform with user authentication and session management
- Implemented RESTful APIs for booking and user data handling
- Designed responsive UI with optimized component structure in React
- Integrated MongoDB for persistent data storage

Stock Trend Predictor | Python, Machine Learning, TensorFlow, LSTM

- Developed a stock price prediction system using machine learning and deep learning techniques for time-series forecasting
- Implemented data preprocessing pipeline including normalization, sequence generation, and feature scaling
- Built and trained LSTM-based neural network model to capture long-term temporal dependencies in stock market data
- Evaluated model performance using error metrics such as RMSE and MSE to measure prediction accuracy
- Visualized predicted vs actual stock trends to analyze model effectiveness

EDUCATION

Bachelor of Science in Information Technology

Sathaye College (2023 — 2026)

CERTIFICATIONS

- Cybersecurity Internship — Digisuraksha (2025)

ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms problems on coding platforms
- Completed 20+ PortSwigger Web Security labs
- Built and deployed real-time and full-stack applications using MERN stack
- Implemented a time-series forecasting model using LSTM for stock prediction
- Performed hands-on web security testing during cybersecurity internship
